SERIES 500

**HIGH-SECURITY
ELECTRONIC SWING HANDLE.**

OVERVIEW

High-security electronic system offers smart cabinet protection with versatile locking options.

Upgrade your cabinet security in the field with the Series 500. This impressive handle is built in stainless steel offering a robust, attack resistant solution to multi-point locking with interchangeable cylinders. Can be fitted with an optional gearbox and rod system for three-point locking (pictured).

Key features

- Specifically designed for street furniture, outdoor applications, utilities and critical infrastructure
- Keep your existing locks: S500 accept a variety of inserts, including cylinders and euro profiles
- Built-in anti-drill, anti-cut and anti-drive through protection
- Multi-point locking gearbox and rod system option
